

Group Medicare Insights: The Humana difference

At-a-glance: Humana's data and reporting ecosystem

By putting information and insights into the hands of members, providers and plan sponsors, Humana's innovative data and reporting tools help identify gaps and opportunities for

improving member health, which can help lower costs for everyone.

Member tools

SmartSummary

This consolidated monthly report replaces individual Explanation of Benefits (EOB) mailings, providing comprehensive information about benefit usage, such as claims, deductibles and dollars spent. SmartSummary helps improve member outcomes by providing personalized insights and recommending actions for closing care gaps.

MyHealth Summary

A personalized health record, MyHealth Summary makes it easy for members to manage their health and easily share information with their care team.

Plan sponsor tools

PlanCompass

This reporting and analytical tool provides a comprehensive snapshot of plan performance, including claim utilization information, members' wellness participation and pharmacy data. PlanCompass allows plan sponsors to identify cost drivers, keep track of trends and discover opportunities for improvement. The tool also enables plan sponsors to pull utilization by geographic filtering.

Provider tools

Population Insights Compass

A centralized reporting platform that delivers a holistic view of patient health, Population Insights Compass (PIC) offers providers insights into patients' medical histories as well as their physical and social well-being. PIC also uses predictive modeling to identify social determinants of health and potential readmissions, enabling physicians to provide better care.
